Create new values of space with partitions

Business Outline

Supply a wide variety of partitions as a manufacturer of long standing

They work in manufacturing and executing wooden fittings and FUSUMA (paper-covered sliding doors and partitions). The founder Mr. Tomizo Tanimoto founded as "Tanimoto paperer". Thereafter, the second president, Mr. Kazuo Tanimoto advanced to fitting industry. The current president who is the third, Mr. Akira Tanimoto started an internet business in 2008. Herewith, they prospered to expand business in renovation and DIY

markets. They are putting effort into supplying fashionable and uncompromising partitions, more than the amount of orders, as looking beyond the decreasing of newly -built Japanese style room executions by an aging society in Japan. They receive full custom-made orders of partitions which use existing frames and receiving favorable reputations from renovation agencies. They also obtained a capability to produce FUSUMA with a wide variety of design from introducing a large ink-jet printer. As a recent trend, Japanese style FUSUMA such "Fujin & Raijin (Wind god & Thunder god) design is getting popular for accommodation due to increasing of the number of demands for tourism.
